

SkinPen Micro needling Treatment

SkinPen is a motorized micro needling device that is used to improve fine lines and wrinkles, acne scars, pore size and skin tone/pigmentation conditions such as melasma and sun spots. The device creates thousands of microchannel that stimulate your body's natural wound healing process, while minimizing cellular damage. This rejuvenates your skin from the inside out.

Prior to your treatment:

- Skin care: make sure you are following your skin care instructions carefully to help Optimize treatment results. Optimal results are achieved with multiple treatments Spaced one month apart while using your skin care products to boost collagen at home.
- Come to your appointment with clean skin (no makeup or lotions)

During the treatment:

- A numbing cream will be applied 30 minutes prior to the start of your appointment to Minimize discomfort
- Most patients report feeling only the slight vibration of the SkinPen during the Procedure with little to no discomfort
- The procedure takes about 30 minutes to complete

After your treatment:

- You will receive Skinfuse® LIFT, a clean, non-cytotoxic hydrogel that prevents the skin From drying out post-treatment. This will be applied to skin for the initial 24-48 hours after treatment.
- No tretinoin (Retin A), retinols, Vitamin C, Lightening Creams or Exfoliants should be used for 5 to 7 days post treatment
- After 24 hours you may apply a light moisturizer
- Walking without sweating can be resumed after 24 hours. More intense exercise can beresumed after 48 hours.
- Avoid sun exposure for 3 to 5 after SkinPen treatment and keep a hat and sunscreen onif you will be exposed to sunlight. Apply a mineral-based sunscreen with SPF 50 daily.
